As far as a career in a STEM (Science, Technology, Engineering, or Mathematics) field, I do think that it is becoming more and more like a combat. As I've got older, this has become more obvious. A career in a STEM field is very

Ä .Paradoxical after-effects of feedback on perceptual decisions. Feedback on perceptual judgments can sometimes affect the subjective perception of subsequent trials, even when the feedback is displayed after the subjective percept has already been decided. The authors demonstrate a similar phenomenon after-effect, with feedback for perceptual decisions, in a task where the feedback can be presented before, during, or after the response. When feedback is presented earlier, it tends to cause a decision bias toward the previous response, whereas when feedback is presented after the response, it tends to cause a bias toward the previous decision. The after-effect is often exacerbated when a participant receives additional negative feedback on errors, suggesting that negative feedback amplifies the perceptual and decision biases in the presence of the after-

effect. In addition to previous studies in decision-making, the authors show that similar effects can occur in a motor control task and in a simple perceptual task.Q: ThreadPools and concurrency I am confused about thread pools and the difference between thread pools and thread management. The core of my question is: When I run ThreadPool.QueueUserWorkItem, does that mean that threads will be generated, and then the entire thread pool will queue all that work at once? Or does the thread pool process work in real time, such that all threads will queue the

A: Here's the basic pattern to get to the innermost element: element.find("span.step").next("span").siblings(".step").next("span").siblings(".step").next("span").next("div") Basically just follow each.step element to the next span. Wednesday, April 24, 2011 Newly appointed top psychiatrist of the Philippine National Police said suspected Moro rebel Abu Sayyaf leader

---

Isnilon Hapilon is indeed nuts. Joel Belmonte, who will head the Camp Verde segment of the “Ang Probinsyano” anti-insurgency campaign, said Hapilon was ordered his commando squad to break off from the Abu Sayyaf for a time and join the government-sponsored “oath making” rally in Basilan last month. “There is nothing rational in what he has done. It is all a big show for the world,” Belmonte told ANC’s Balitanghalian Network. “If he sees the leader coming and sees him calling for Hapilon to come, he would happily stand up with the other oath-takers and pledge to the leader who would make him a drug lord (so that) he would be a drug lord forever,” Belmonte added. Belmonte’s statements came a day after the Philippine National Police said Hapilon, at age 40, has trained his rogue group of around 1,000 followers how to resist arrest and even stave off high-powered firearms. Some of Hapilon’s top commanders and rank and file gunmen recently trained in jungle warfare and sniper shooting. Hapilon, named as a global terrorist by the US, received a bounty of \$7 million and other rewards by the US State Department last year. The PNP in January this year launched a major anti-Moro campaign under the banner, “Ang Probinsyano.” The police effort includes militarizing all crime investigation units, enhancing intelligence gathering, the use of undercover operatives and pressure on local officials to cooperate. It has been attended by the President, the top Philippine leaders and military officials from the Visayas and Mindanao regions who have been battling for decades for independence and democracy.
