About This Game

Train Valley 2 is a train tycoon puzzle game. Take your railroad company from the days of the Industrial Revolution and into the future, meeting the needs of the valley's cities and industries. Build railroads, upgrade your locomotives, and keep your trains on schedule without delays or accidents. All aboard — the train is leaving the station!

Enjoy engaging and addictive gameplay, combining puzzle micromanagement with tycoon elements.

Discover the history of railroads in elegant low-poly graphics!

Keep your trains running on schedule across 50 levels in Company Mode.

Upgrade your stock of locomotives and acquire advanced engines, with 18 models to unlock.

Produce and ship increasingly sophisticated goods in more than 45 types of train cars.

Jump into our Level Editor with Steam Workshop integration and create your own Valleys - or play levels from other players!

Create your own mods with custom locomotives, train cars, industries, and resources from your favorite time or universe.

A quite good followup to the original Train Valley. New mechanics make it better than just more of the same and a level editor will vastly expand the lifetime of the game. I highly recommend it. TV2 has just launched on Early Access and I've finished my first play through of TV2 as it stands (20 levels). I really like the new mechanics and systems of TV2 from TV1. It's a fresh game with that feeling of similarity.

It took me a little over 5 hours to complete the 20 levels. Supposedly there will be 50 levels total. Each map has different accomplishments that you need to meet. You can get a total of 5 stars for each map with 3 stars for finishing quickly and another 2 stars based on a variety of challenges. (e.g. don't stop a train, no trains to the wrong station, crash 5 trains, etc) I've gotten 4 stars on most maps with a few 5 stars. I haven't replayed any levels.

As usual with any EA game, there are some tweaks that need to happen. However, it's fully playable and I didn't experience any major bugs or issues.

I've made some suggestions to the devs and they very quickly responded. Gotta love when devs are active and listening to the community.

Verdict: I like it and think \$10 is a reasonable price for the game.

. This is a great simple game.. few bugs with a few null references (as expected in early access).. but not enough bugs to detract from gameplay.

Very enjoyable and highly recommended. Do you want to unwind? Do you like trains? Do you like casual puzzle games? Do you like casual puzzle games about trains? Buy this game.. After playing TV1, I was so looking forward to this game. And, it is not bad, you can get enjoyment from it as such, but, it is not a sequel to TV1. The entire concept is changed now, and now it is more like Train Tycoon instead.

Sorry, I was so looking forward to the game, but I returned it. Steam really needs a 5/10 rating: I don't hate the game, but it's too flawed to unreservedly recommend it either.

Did you enjoy Cat Mario? If so then this is the perfect game for you.

Otherwise, you might have trouble playing this game for more than 15 minutes at a time because, contrary to the description, it isn't really a strategy or puzzle game because the planning aspect is minimal (in what order should you connect the various buildings) and are primarily judged on your ability to accurately execute your moves (dispatching trains and toggling signals).

This obviously makes the game very frustrating - if you accidentally stop a train (causing you to fail an optional objective) in the last 10s of a mission then you will have to redo the first 15min of the mission from memory. This is especially bad given that many missions involve essentially random changes to the level layout (e.g. volcano taking out key connections) which requires the player to restart their attempt when it happens.

In theory you can try to optimize your strategy but given that every attempt will result in 15min of tediously repeating the same moves over and over again it really fails as a puzzle game.

The graphics are cute but not quite up to the task - in particular, it's not entirely clear which slopes support rails and which are too steep.. I lost track of time and played till 4 am which hasn't happened in a while. In other words, great game!

It took me about 6 hours to complete the current 20 levels and I am going to hunt all those stars next (which is the real challenge here)

The game is well designed in the sense that it can be pretty relaxing game, you can take your time and admire the scenery etc, but to complete the levels with all stars can be pretty hard.

The trains are just so fun and cute and come on deploy another I can juggle 'em all no problem oh \$#!T this train is going wrong direction wait stop that train nonono a crash oh well there goes my workforce and precious chairs going into town where will the townfolk sit IS THERE NO GOD

There isn't another train game like this, one-of-a-kind, really cool! The satisfaction when you know exactly what is happening and there is 6 trains going on and you know where everyone is going and you go click clickety click on those switches to guide the trains, ahh

Fantastic game... so addictive. A beautifully designed set of puzzles with a whole spectrum of solutions. Some describe it as relaxing, others as tense! Once you play through the 50 core levels, there is a vast array of workshop levels to play through, and many of them are fantastic quality. Start with the 'Featured' levels - you won't be disappointed.. An excellent successor to Train Valley 1.

Instead of trains spawning at random stations with random destinations, you're tasked with having to move product from one station or factory to another, in order to create goods.

A little more strategy and a little more micromanagement.. Very nice game. I loved original Train Valley and even thou this has bit different mechanics/etc its also awesome game to play.

ATM its Early Access but game works very well, no bugs/etc. Not all levels are there yet thou.

I can recommend this game for everyone.. Micro management with trains! You basically harvest resources and move workers from one location to another to get a desired product. All while racing to get a good time and those bonus stars!

Here is my first look video if anyone wants to see me fail and blow trains up :).
